SUMMARY

Every expert was once a beginner, and my journey into software development is fueled by a genuine passion for learning and creating. As an aspiring developer, I have been expanding my skills in JavaScript, Node.js, Express.js, and MongoDB while continuously exploring the ever-evolving world of technology. I am fascinated by how code can turn ideas into reality and am committed to growing my expertise, embracing challenges, and building meaningful digital solutions one project at a time.

SKILLS

Frontend HTML5, CSS3, React.js, Responsive Web Design	Backend Node.js, Express.js
Database MongoDB, Mongoose ODM	Programming Languages: JavaScript (ES6+)
Web Development: RESTful APIs, CRUD Operations, Authentication & Authorization	Deployment & Hosting: Website Deployment, Server Configuration, Environment Management
Software Engineering Concepts: Object-Oriented Programming (OOP)	Computer Science Fundamentals: Data Structures & Algorithms (Currently Learning)
Development Practices: Debugging, Problem Solving, Code Optimization	Version Control: Git & GitHub
API Testing: Postman (API testing, request handling, debugging)	AI Development Tools: Cursor AI, Antigravity

PROJECTS

CRM Management System (Full Stack Project)  - Built a full-stack CRM system using JavaScript, Node.js, Express.js, MongoDB, and Mongoose - Designed and implemented RESTful APIs for managing customers, leads, and tasks• Developed authentication and role-based access control (if included) - Managed database schema design and optimized data relationships - Deployed the application and made it accessible online• Focused on clean architecture, scalability, and modular backend design
Personal Resume Portfolio Website - Built a personal portfolio website to showcase resume, skills, and projects - Designed a clean and responsive UI using HTML, CSS, and JavaScript - Embedded resume directly into the website with download option - Added dedicated sections for About Me, Skills, Projects, and Contact - Showcased CRM project with GitHub repository link - Deployed the portfolio for public access using hosting platforms like Netlify/Vercel - Focused on clean design, readability, and professional presentation - Created a personal branding platform for job applications

EDUCATION

Bachelors of computer science
University Of Punjab
